

# How to Measure for Garage Door Trim

1. Measure the rough opening of the door frame from tip to tip (A) and put that dimension on the form.
2. Measure the height of the garage door frame from tip to tip (B) and put that dimension on the form.
3. Measure the extension jamb of the door frame from tip to tip (D) and put that dimension on the form.
4. If arched: Measure the height of the rise (C) and put that dimension on the form.

## Sample Line

Product Part #	Garage Rough Opening Measurements	Jamb Depth (D)	Check All That Apply	Quantity	Type of Siding
GDT-3	(A: <b>107 1/2"</b> ) X (B: <b>90"</b> ) If Arch Top (C: <b>18"</b> )	<b>5 1/2"</b>	<input checked="" type="checkbox"/> Built-in J-Channel <input checked="" type="checkbox"/> Vinyl Nailing Flange <input type="checkbox"/> Keystone <input type="checkbox"/> Dentil	<b>2</b>	<b>Vinyl Quest</b>
